CREATIVAS CHEAT SHEET

Sneak Peek at our Apps

Definitions and main Features

Smart Images

- Import images from Confluence pages or Spaces, upload or add external links.
- Edit your images without leaving Confluence, crop, add filters, finetune, annotate and add texts and shapes.
- Image maps: Use different shapes (Rectangle, Circle, and Polygon) to draw clickable links directly on images.
- Customize sliders and galleries, and display full screen while viewing Confluence page.

“All in one image toolkit”
Smart Images for Confluence is a powerful image editor app.

Smart Terms

“Bring your entreprise glossary to the next level”

Smart Terms for Confluence allows you to create a meaningful glossary for your enterprise.

- Create definitions and related vocabulary such as synonyms, acronyms, slangs, idioms and others.
- Add enriched media assets to your glossary.
- Retrive enterprise terminology within a space, page or across all spaces.
- Import & export existing enterprise glossary from Excel or CSV files.

Smart Courses

CLOUD FORTIFIED

- Create your course/ exam with different interactive content: images, videos, audio, quizzes, Confluence pages, and embed HTML and much more.
- Publish your course in the course catalog per space or globally.
- Restirict and assign courses to individuals or specific groups.
- Track attendees learning path and assess their individual learning progression through metrics.

“Build your LMS within Confluence”

Smart Courses for Confluence enables to build captivating courses for your e-learning program.

Smart Tables

“Transmute the Excel experience into your Confluence tables”

Add powerful Excel functions and filtering features to native Confluence Tables.

- Work on all existing and new Confluence tables without macros.
- Use more than 300 Excel functions including formulas, logics and conditions.
- Filter, hide, or highlight search results.
- Locate cells easily with the automatic spreadsheet grid.
