

Smart Terms highlighters

Smart Terms Extension

Upload it to your browser

When enabled; terms will be highlighted on the same Confluence page you're viewing.

When disabled; it will redirect you to a modal page (by clicking on the modal highlight icon)

Modal Highlighter

Already exists on your Confluence page

It redirects you to a modal page where you'll have the terms highlighted.

FYI: the modal and the extension complete each other.

Terms Highlighter macro

Browse it in the add button from the tool bar

By adding content to the macro, the terms will be automatically highlighted when you load the page.

FYI: It works separately from the modal & extension.
