

# Employee & Customer Onboarding

Onboard your Confluence newbies and customers by creating different courses in the onboarding space.

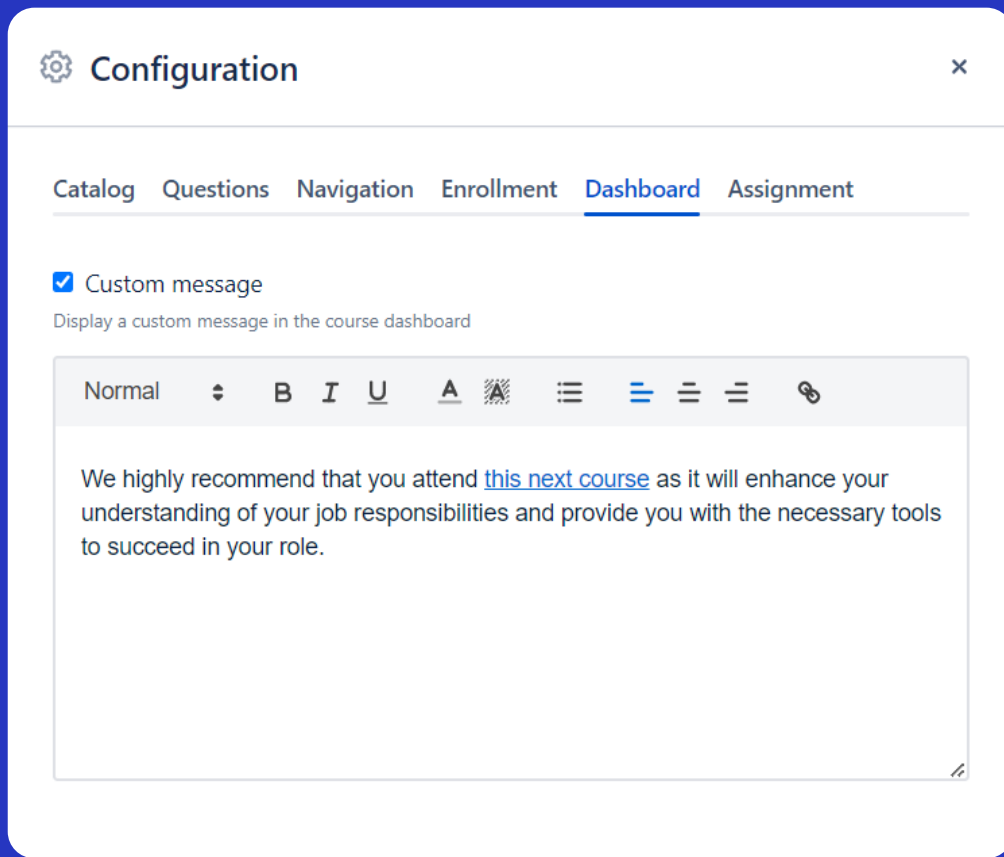

## Add “onboarding” category or label to the course

This ensures accurate filtering when searching for courses.

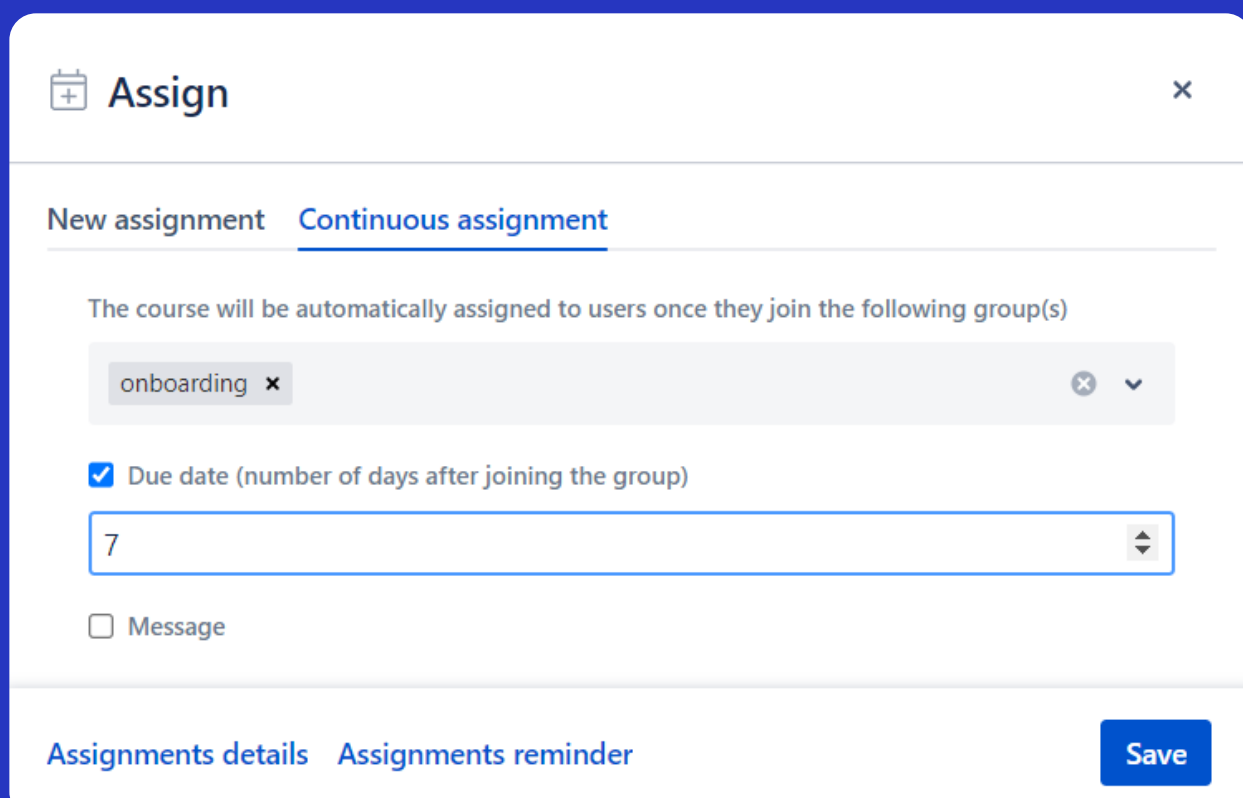

## Use the “dashboard” to lead the users to the next course

Write a custom message to the users, whether to wish them good luck or to convey information, that can be seen at any time while taking the course.

## Assign courses to groups only using the “continuous assignment”

This option will activate automatic assignment to every new user joining the group.

## Enable “Allow enrollment after due date” option

Assignment due dates restricts course access if it is overdue. Therefore, the below option is helpful to give them access after the due date.
