

The Miller's Europe Trip

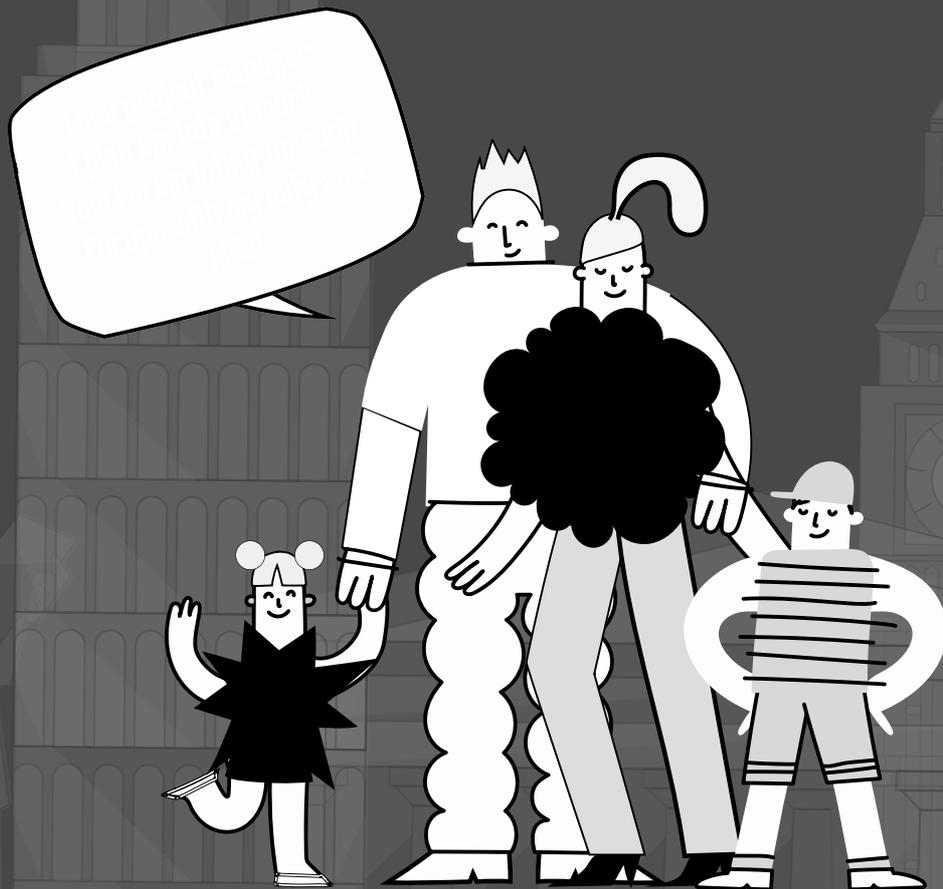

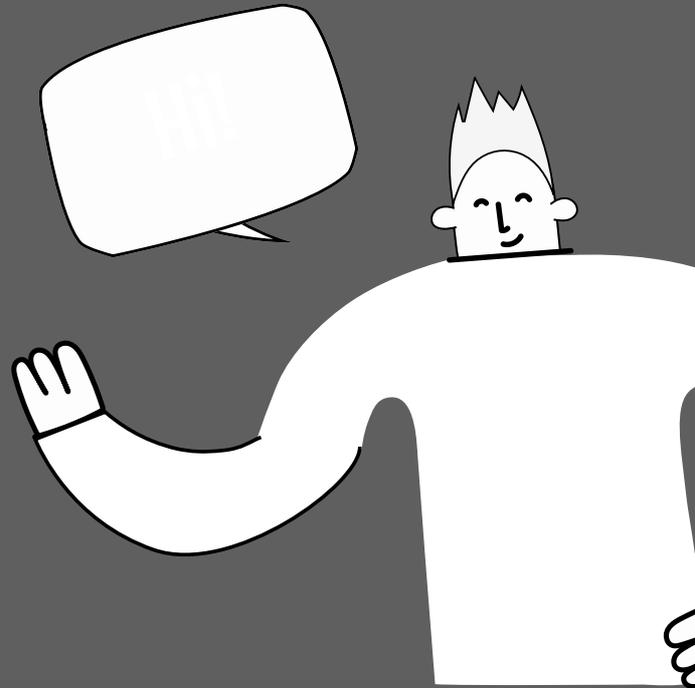

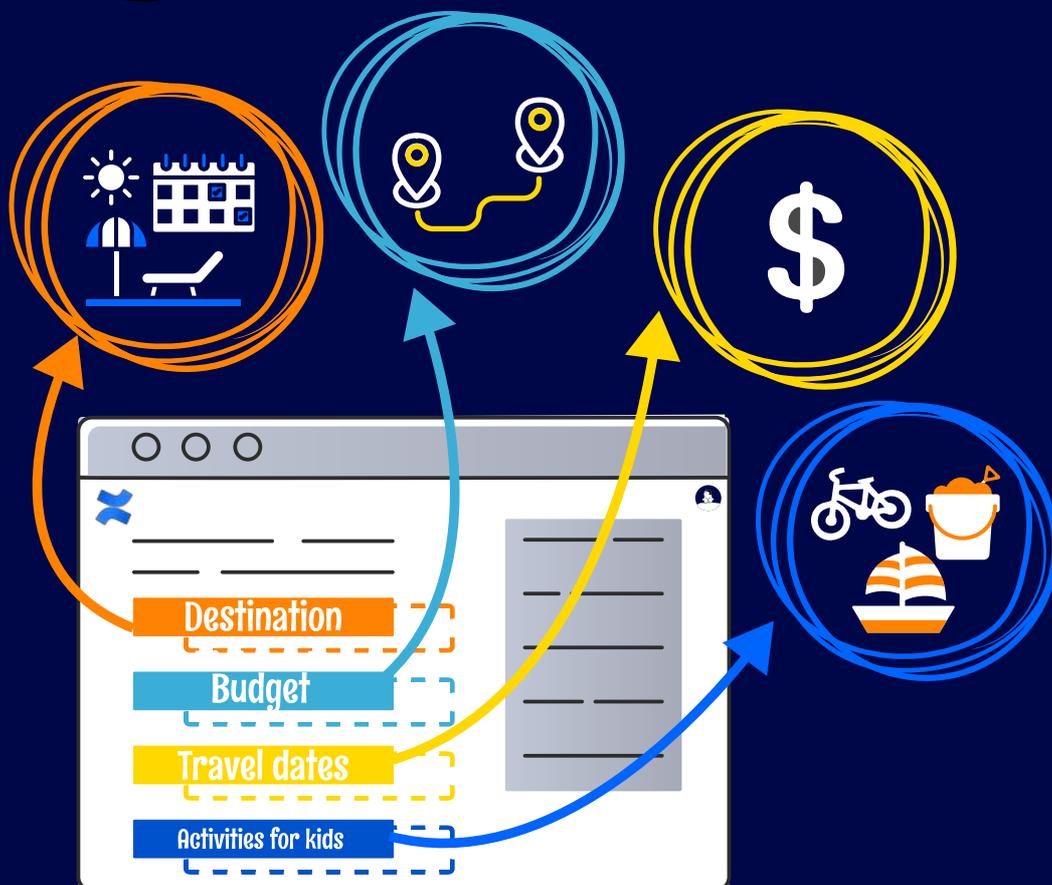

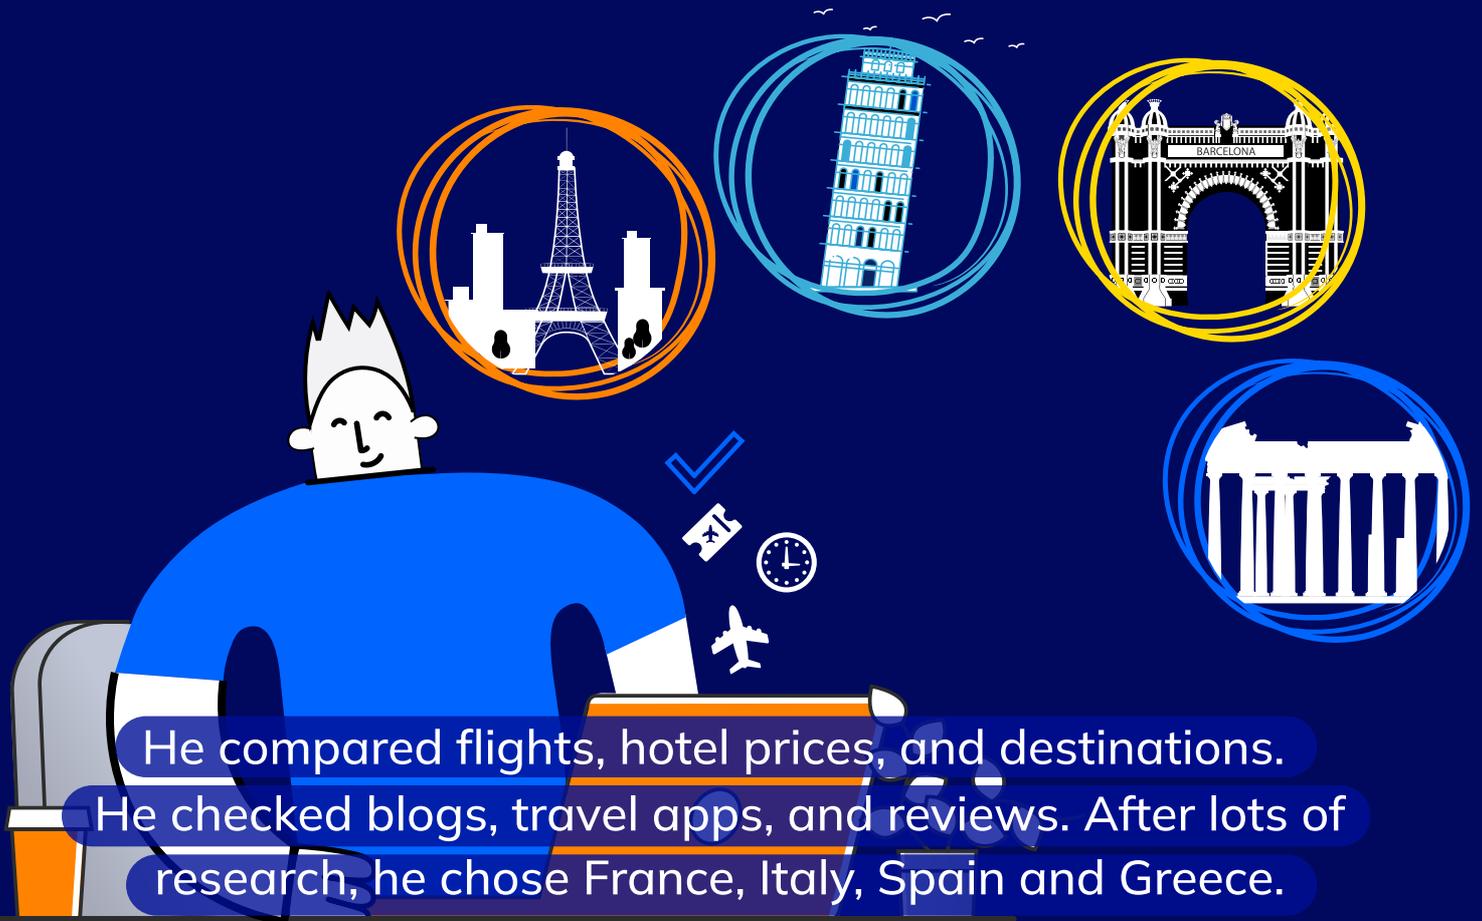

Episode 1

Meet James, mid 50s, lives in the U.S. with his wife and 2 kids.

A Project Manager.

This year, he wants to plan something special.

To surprise his family, he prepared a full plan on Confluence. He created a page with everything.

James Miller's Family Space / Surprise: Our Big Summer Trip!

Surprise: Our Big Summer Trip!

Owned by James Miller · 4 days ago · 1 min read

Hey Family,

Guess what? This August...
We're going to EUROPE!

I've planned something special for all of us, and I'm so excited to finally share it with you.

Countries We're Visiting:

Country	Highlights
France	Eiffel Tower, Disneyland Paris, croissants overload
Italy	Gondola rides in Venice, pizza workshops in Florence, Roman ruins
Greece	Santorini sunsets, ancient Athens, beach adventures

Travel Dates:

- Departure: Sunday, July 14th
- Return: Monday, August 5th
- Total Duration: 23 days of discovery, family time, and fun!

Where We'll Stay:

City	Accommodation	Type
Paris	Mercure Paris Centre Tour Eiffel	Hotel
Florence	Cozy Family Apartment in the city center	Airbnb
Santorini	Beachfront Villa with a view	Rental

Trip Activities Overview
(Hover over unfamiliar names to see explanations — powered by Smart Terms!)

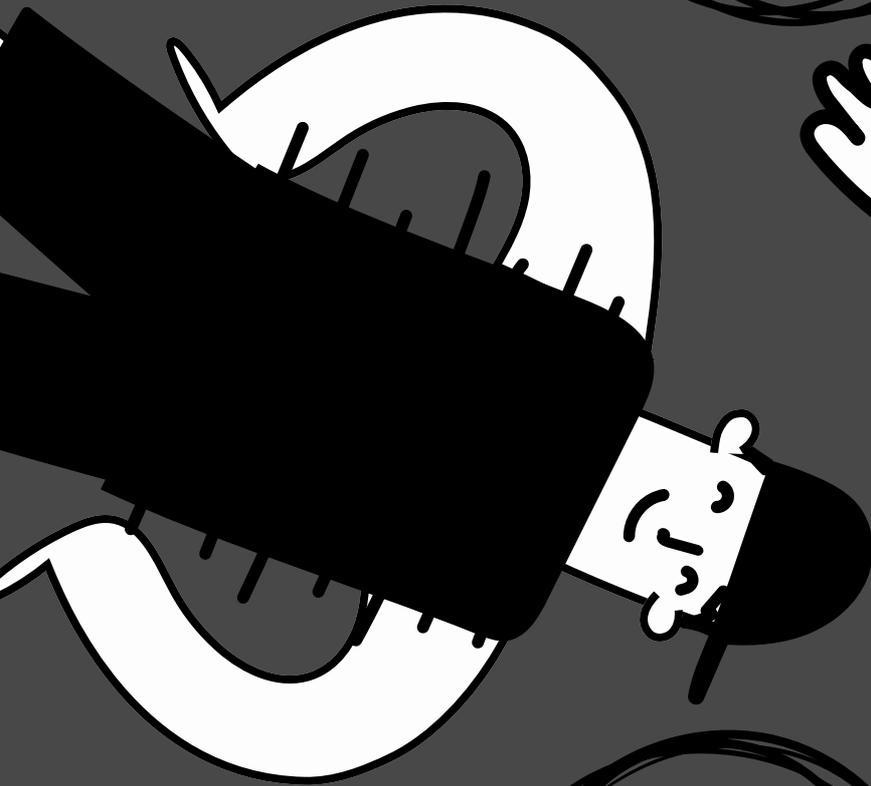

Country	Top Activities	Status
France	Disneyland, Eiffel Tower picnic, Louvre tour	Confirmed
Italy	Pizza making class, Gondola ride, Colosseum visit	Booking this week
Greece	Boat tour, Acropolis tour, beach day	Finalizing details

James finally shared the Confluence page after dinner.

Episode 2

Dad,
can we
really eat
snails?

What's
Saganaki?

James and his kids just landed in Europe...

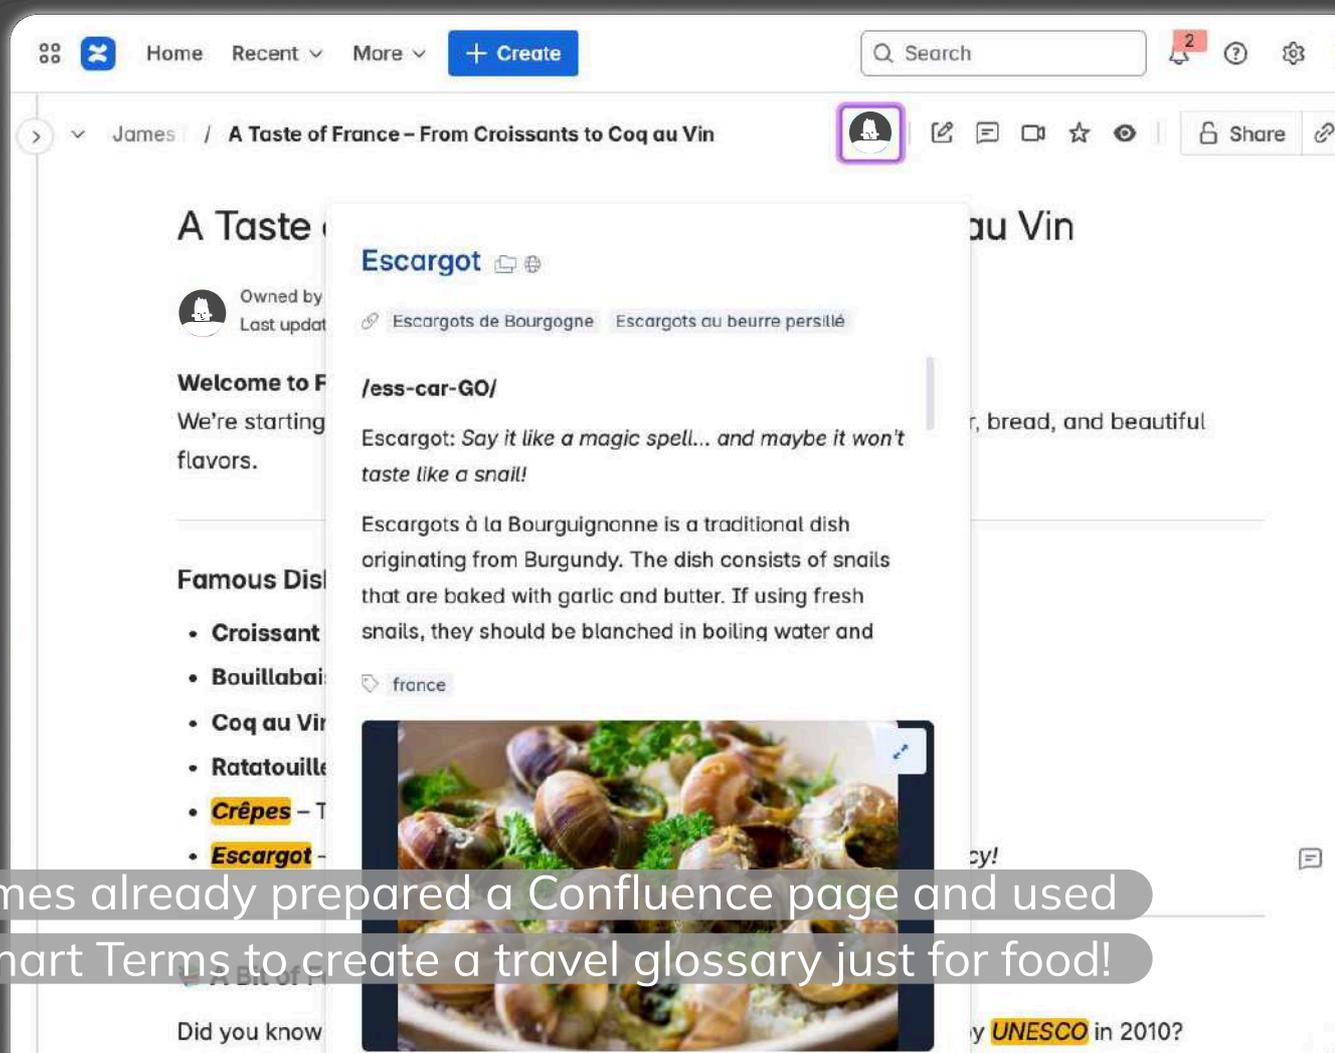

And they're on a mission:
Try the most iconic dishes in every country!

MENU

With so many local dishes, it's easy to forget what's what or order something "weird" by mistake.

James already prepared a Confluence page and used Smart Terms to create a travel glossary just for food!

Escargot 📁 🌐

🔗 Escargots de Bourgogne Escargots au beurre persillé

/ess-car-GO/

Escargot: Say it like a magic spell... and maybe it won't taste like a snail!

Escargots à la Bourguignonne is a traditional dish originating from Burgundy. The dish consists of snails that are baked with garlic and butter. If using fresh snails, they should be blanching in boiling water and

📍 france

What It Looks Like:

Every dish had: A clear definition, A picture, Pronunciation help, Tags by country or type (dessert, starter, local fave)

Real-Life Impact

- The kids knew what to order
- They now speak a little bit of 3 new languages
- No more mystery meals or I don't eat this
- They even started rating dishes they tried!

It turned dinners into a cultural adventure.

Whether you're

Communicating with a
global team

or

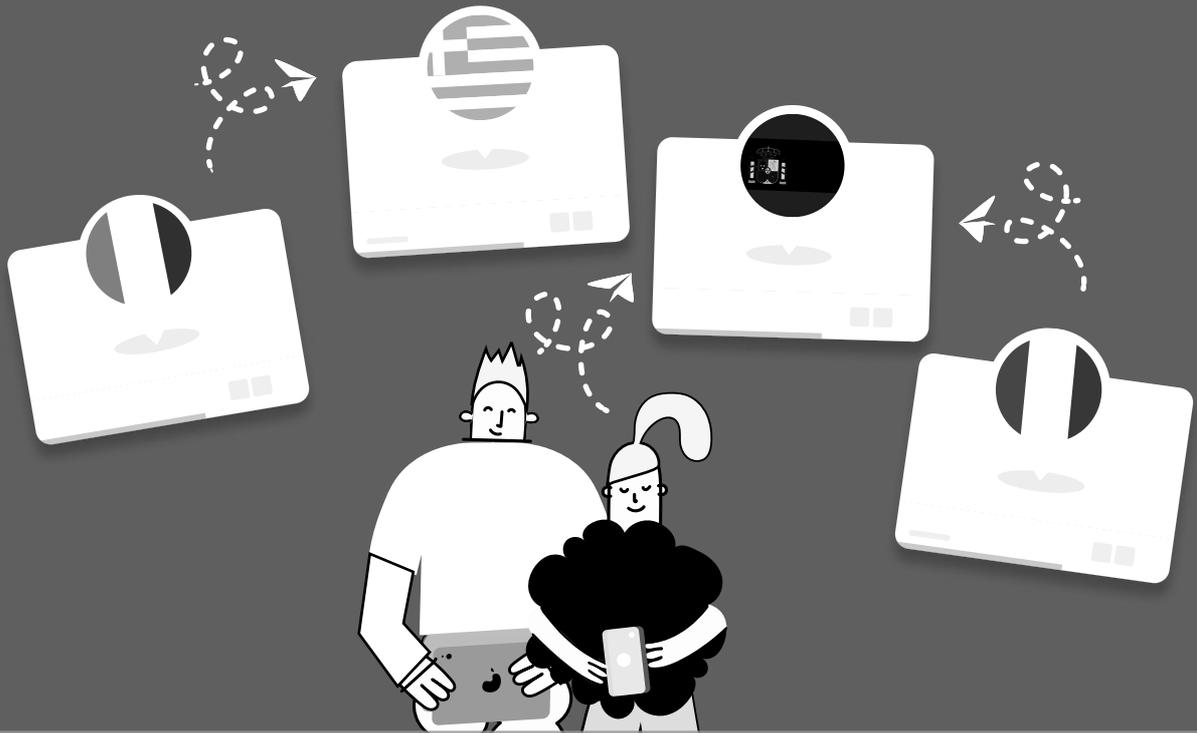

Helping your kids explore
the world

 **Smart Terms** for Confluence makes everything
easier to understand and more fun to explore.

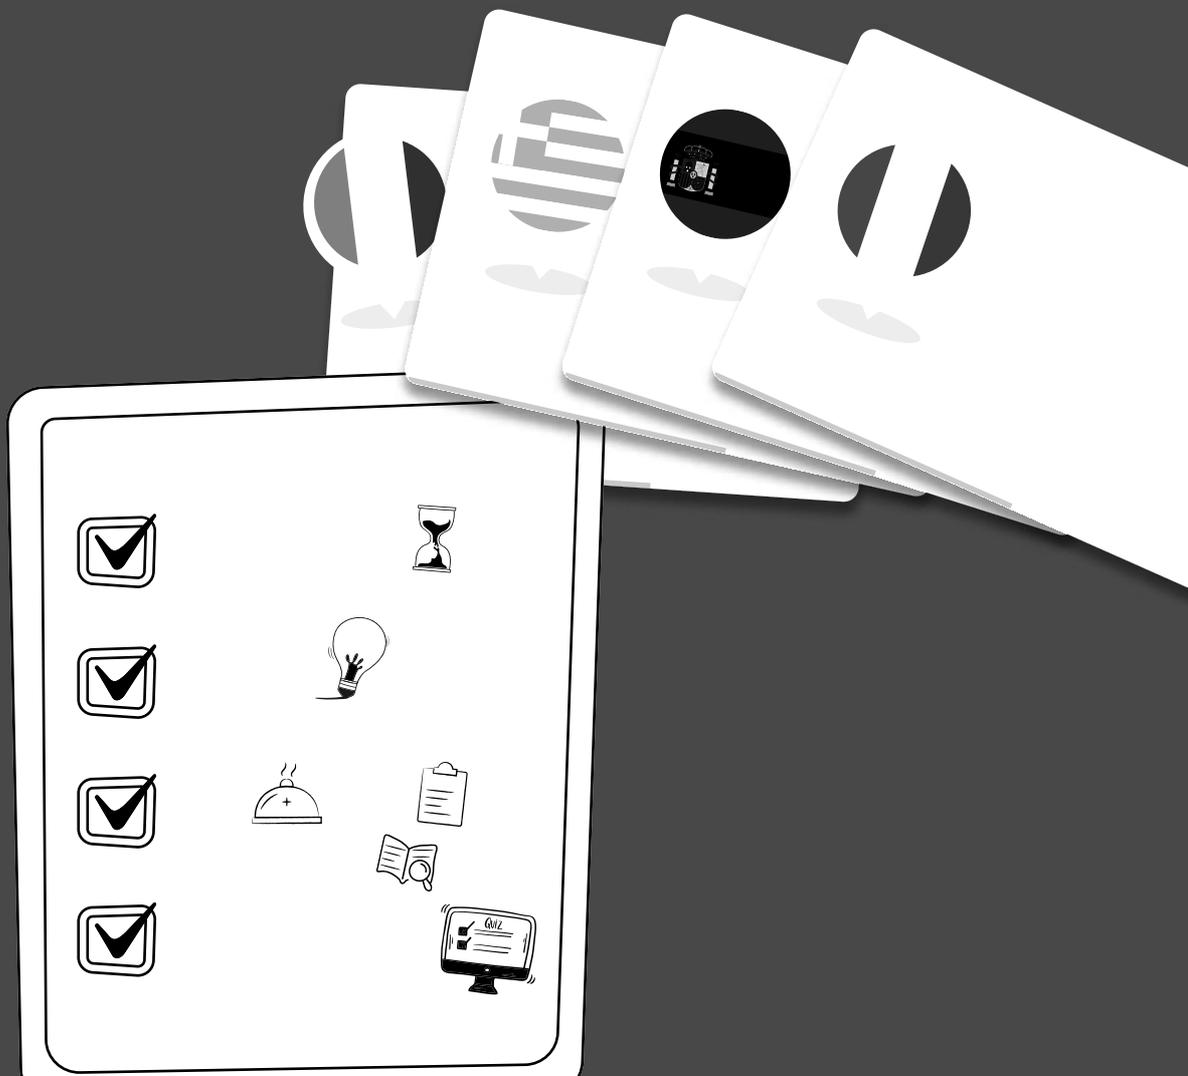

Episode ③

Gate time
is
game time

How James turned country facts
into family fun with Smart Courses for LMS ?

Before the vacation, James and his wife spent a weekend building shorts, engaging courses with **Smart Courses LMS**: France, Italy, Spain and Greece.

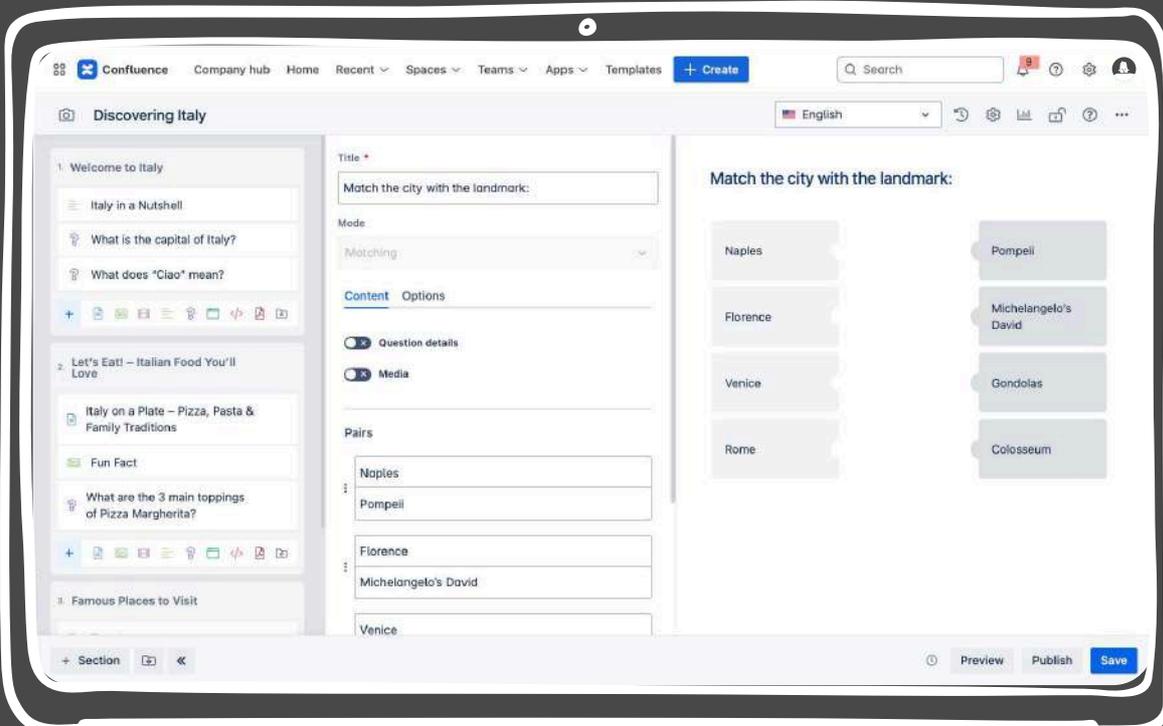

Hey kiddo,
do you wanna
do something fun?

Yaaay

James shared the courses with his kids while waiting at the airport.

Suddenly, gate time turned into game time:

 Who can guess what tapas are?

 Which city has the Colosseum?

 Bonus round: Name 3 gelato flavors in Italian!

1 Add media, quizzes, and progress tracking

2 Works on any device

3 No learning curve, just learning

James didn't need a separate tool. Everything was created and shared right inside Confluence.

 The kids felt confident arriving in each country.

 The parents didn't hear "I'm bored" that often.

 It became more than a trip, it became a shared experience.

Episode 4

The Family Budget Plan

Can I get this?

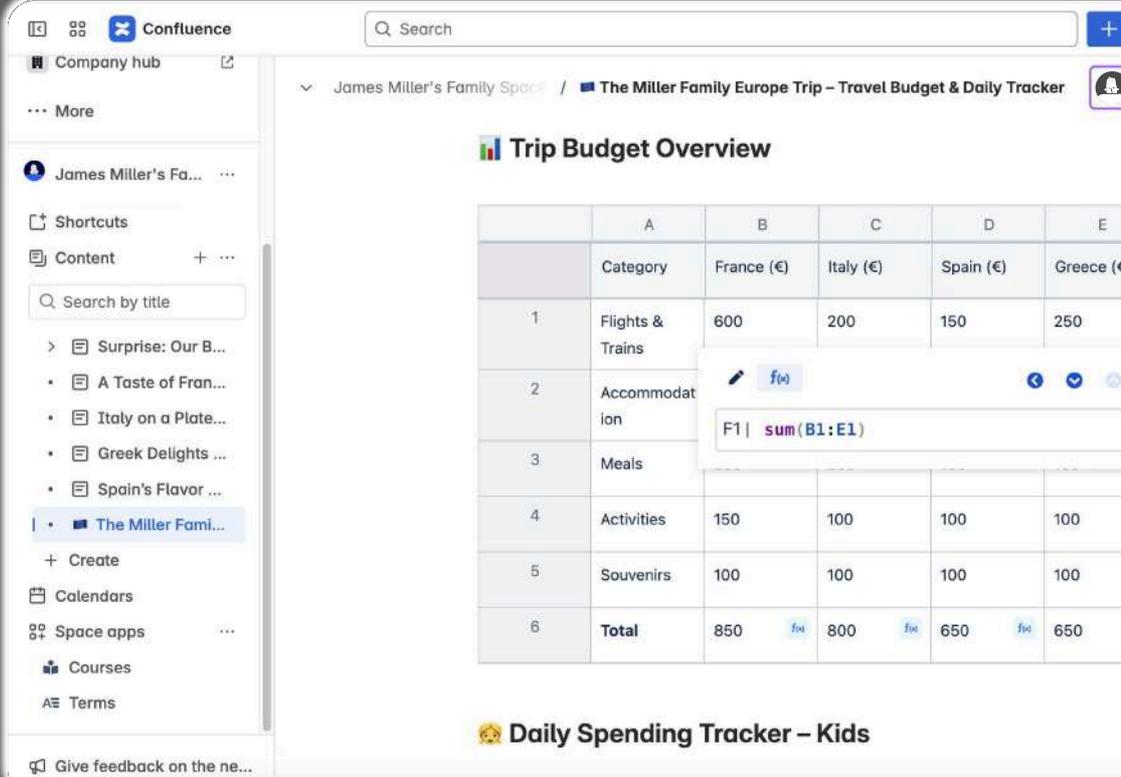

Can we buy that?

Wait... do I have enough for gelato?

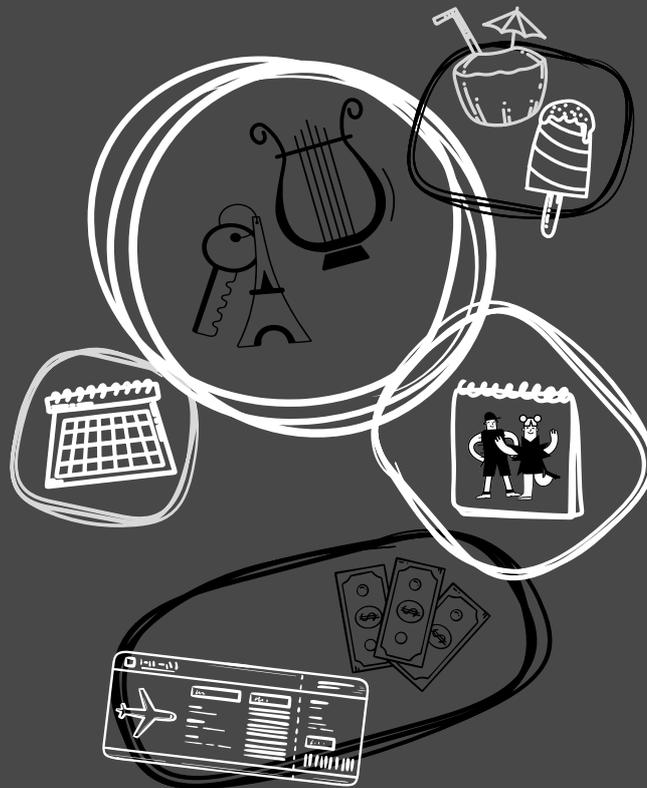

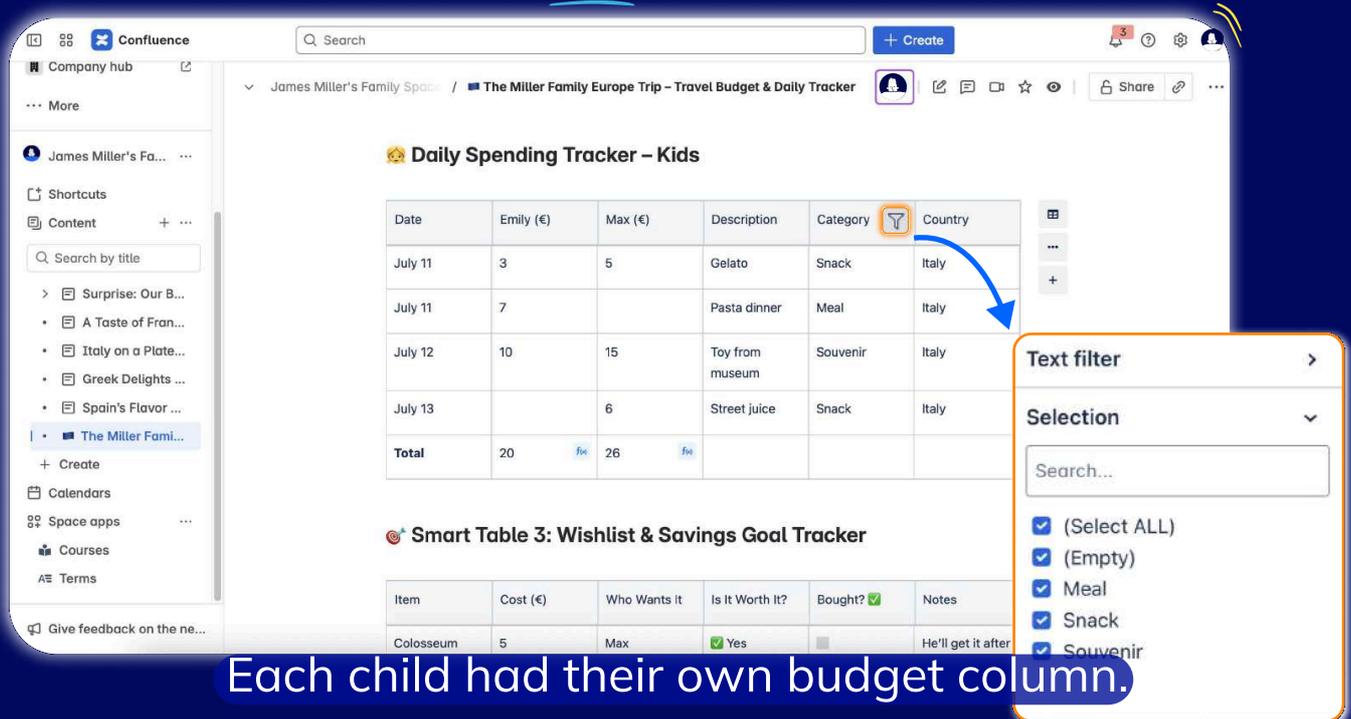

The screenshot shows a Confluence page titled 'The Miller Family Europe Trip - Travel Budget & Daily Tracker'. The main content is a 'Trip Budget Overview' table with columns for Category, France (€), Italy (€), Spain (€), and Greece (€). A formula bar is visible over the table, showing the formula `F1 | sum(B1:E1)`. Below the table is a section titled 'Daily Spending Tracker - Kids'.

	A	B	C	D	E
	Category	France (€)	Italy (€)	Spain (€)	Greece (€)
1	Flights & Trains	600	200	150	250
2	Accommodation				
3	Meals				
4	Activities	150	100	100	100
5	Souvenirs	100	100	100	100
6	Total	850	800	650	650

Before the trip, James created a shared budget dashboard in Confluence using **Smart Tables**.

The table included: Daily spending per kid, Ticket & Hotel costs, Snack & Treat budgets, Souvenir tracker, Automatic total calculations..

Each child had their own budget column.

Every night, they opened the table and:

Logged what they spent, Compared daily totals...

Learned to make small choices (ice cream now, or toy later?)

Why SMART TABLES Made It Easy?

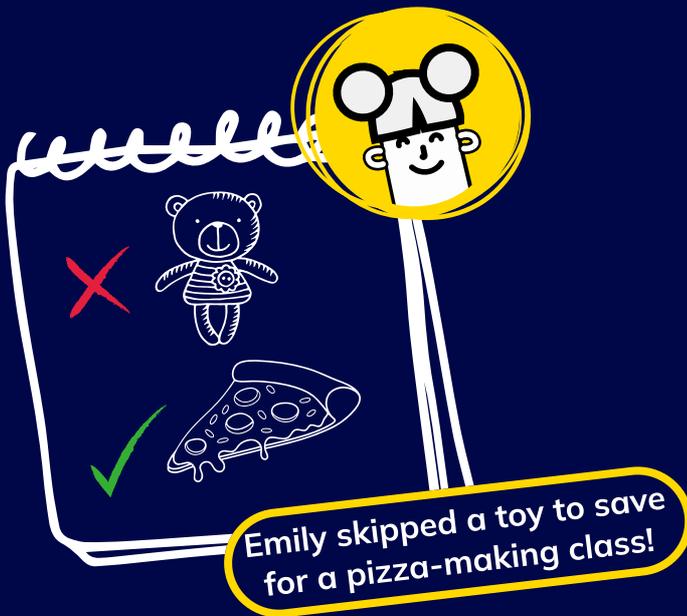

With SMART TABLES,
James could:

2 Add formulas to track totals

1 Build dynamic tables right inside Confluence

3 Filter by person, category, or country

What They Learned ?

A yellow circular icon of a girl with glasses is positioned above a white notepad. The notepad shows a teddy bear with a red 'X' next to it and a slice of pizza with a green checkmark next to it.

Emily skipped a toy to save for a pizza-making class!

A blue circular icon of a boy with a cap is positioned above a white notepad. The notepad shows a drink, an ice cream cone, and a slice of watermelon with a red 'X' next to them, and a soft-serve ice cream cone with a green checkmark next to it.

Max tracked his daily snack budget like a pro

Three circular icons (orange, blue, and yellow) representing different family members are positioned above a white notepad. The notepad shows a hand giving a thumbs up next to a large dollar sign.

Together, the family stayed on budget and actually had fun doing it

**Smart Tables wasn't just about numbers,
It was about teaching values, how to make
choices, and planning...**

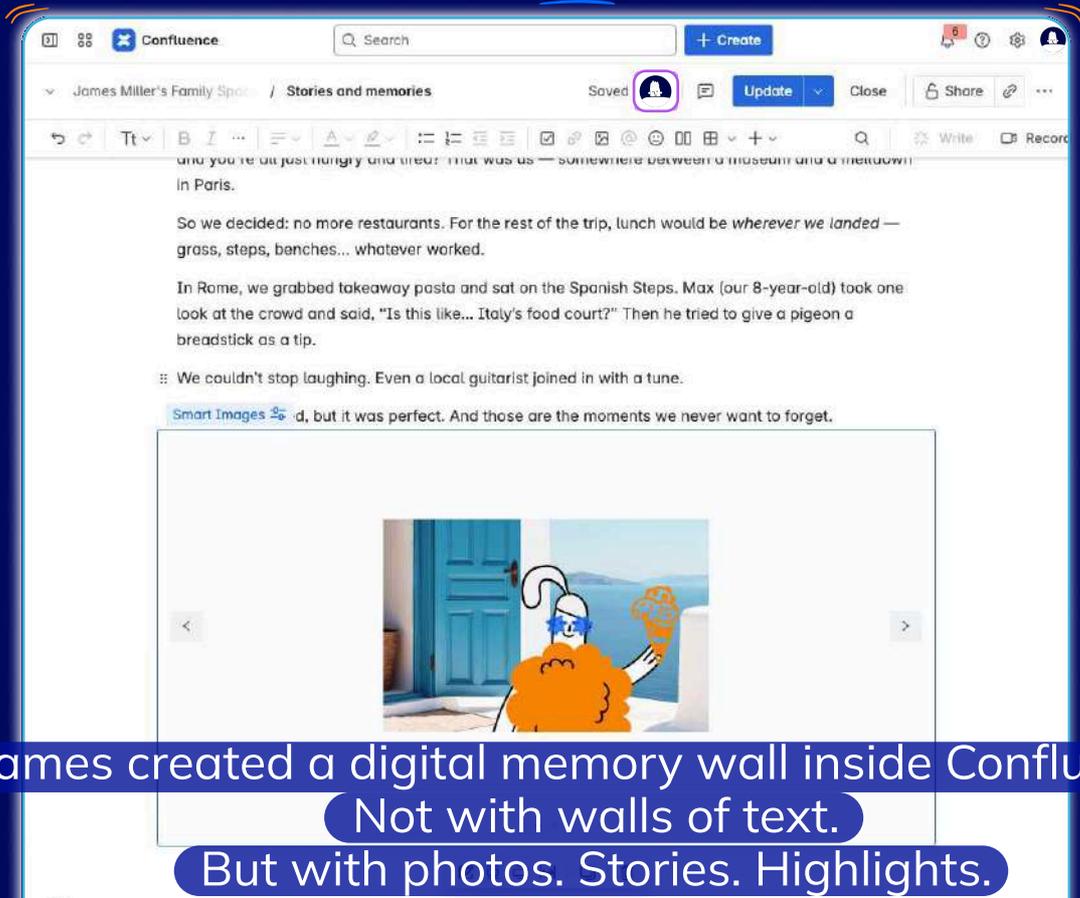

Episode 5

Slides
and
Galleries
to
save
memories

The trip was over. The bags were unpacked.

But the best part? Reliving it together.

James created a digital memory wall inside Confluence.
Not with walls of text.

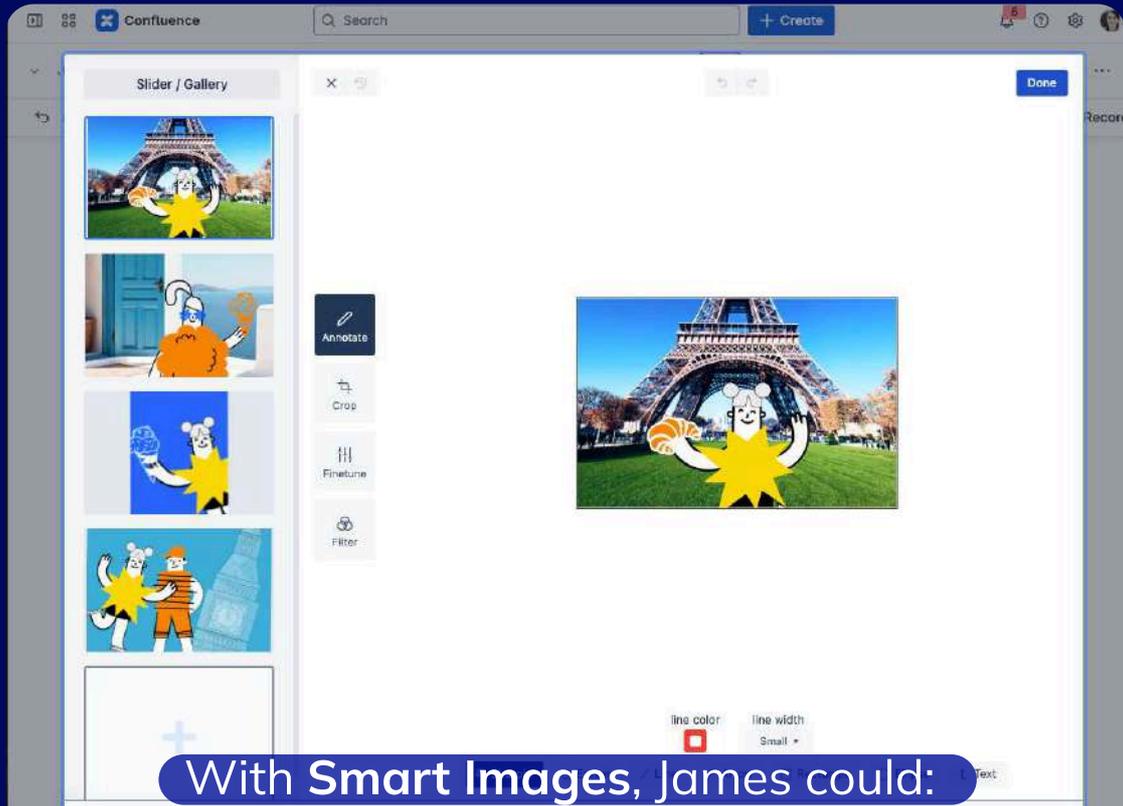

But with photos. Stories. Highlights.

Using Smart Images, he brought their adventure to life.

Captions
Locations
Funny moments 😊

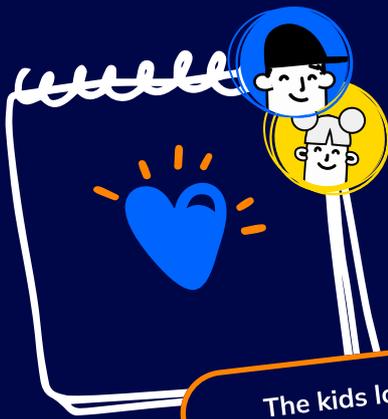

All organized in visual carousels
Edited right inside Confluence.

With Smart Images, James could:

Add sliders and galleries, tag locations, annotate directly on the image, clean up and resize without leaving the page.

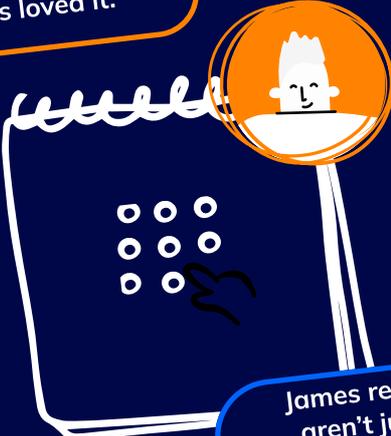

What it meant ?

The kids loved it.

The wife shared it with her friends.

James realized that Images aren't just for instruction, they're also for **connection**.

**Make your content
more visual.**

**Right where you
already collaborate
in Confluence.**
